DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Kiel on 04/27/2007.

The application has been amended as follows:

In the Specification:

On page 1, between the title and line 4, add "BACKGROUND OF THE INVENTION" and immediately below add "1. Field of the invention."

On page 1, line 10, add "2. Related Art."

On page 2, line 16, add "SUMMARY OF THE INVENTION"

On page 3, line 17, add "DETAILED DESCRIPTION OF THE DRAWINGS"

On page 4, above line 1, add "DETAILED DESCRIPTION"

(End of Amendment)

Allowable Subject Matter

2. Claims 1-6 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record, specifically Bertrand et al. (French Publication #2,697,699) teaches system of receiving channels in a domestic environment comprising a retransmission base to amplify channels captured at a point in the said domestic environment and retransmit them to a plurality of digital receivers present in the said environment (Page 4, lines 27-30), wherein: the said retransmission base comprises amplification means to amplify N channels, N being greater than or equal to 2 and less than the maximum number of channels received at the point in the said domestic environment (Page, 6, lines 15-29).

However, none of the prior art cited alone or in combination provides the motivation to teach each digital receiver comprises means of generating and transmitting at least one channel amplification request, each request being allocated a priority level and means of control of the said means of amplification to determine the channels to be amplified according to the channel amplification requests received in compliance with the priority levels when the number of amplification requests for different channels is greater than N.

Dependent claims 2-6 are allowed for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hakenberg et al. (US Patent Application Publication #2002/0004838) teaches data transmission method and apparatus.

Swix et al. (US Patent Application Publication #2004/0250273) teaches digital video broadcast device decoder.

Kliger et al. (US Patent Application Publication #2003/0066082) teaches home network system and method.

Chatterton (US Patent #7,116,894) teaches system and method for digital multimedia stream conversion.
